

## WATER PURIFIERS? HELP NEEDED!

April 20, 2013

By Michael Erlewine ([Michael@Erlewine.net](mailto:Michael@Erlewine.net))

We want to know what water purification systems, small and/or large, actually work and are fairly easy to use.

Our water supply is OK, but there are a ton of minerals, etc. in them that we probably don't need in our system..

If any of you have researched and tested what's out there, please share your experience, brands, and links, if you have them.

We are particularly interested in one for the kitchen for all cooking-related tasks. Please do comment.
