

... SAID THE SPIDER TO THE FLY..
June 10, 2011

By Michael Erlewine (Michael@Erlewine.net)

I know, you like flower photos and not-so-much the spider photos, but life is not all flowers. And this Daddy-Long-Legs is not actually a spider, but a relative and not poisonous in any way. He is also called the “Harvestman.”

This Daddy-Long-Legs has caught what looks to be a Tachinid fly.

Welcome to this (probably going to be) rainy day in Michigan.
